DETAILED ACTION

This office action is in response to the Application filed on December 6, 2007. Claims 1-8 and 12-18 are pending in the application.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charles L. Hamilton (Reg. No. 42,624) on February 7, 2008.

The claims have been amended as specified by Applicant in the facsimile Amendment dated February 7, 2008 which is attached hereto.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art of record, specifically "Getting Started with SNAP™," by Template Software, Inc., in view of "Using the SNAP™ Development Environment," by Template Software, Inc. and further in view of United States Patent 6,748,455 B1 to Hinson et al. does not expressly teach or render obvious the invention as recited in

independent claims 1 and 12. As to claims 1-7 and 12-18, the prior art of record does not teach or render obvious the limitations as recited in claims 1 and 12, receive an event subscription directed to a subscribing component when the subscribing component has not been instantiated, the event subscription specifying subscriptions to one or more events generated by sub-components embedded by the subscribing component; cache events generated by the sub-components that are specified by the event subscription while the subscribing component has not been instantiated; forward any cached events to an instance of the subscribing component after the subscribing component is instantiated; receive one or more context mappings for a component, the context mappings being specified by a component embedder to exchange context data with the component, the context data comprising interface data and configuration data; if the component has not been instantiated, cache the specified context mappings; create the specified context mappings for the component after the component has been instantiated, when taken in the context of the claims as a whole.

Moreover, evidence for modifying the prior art teachings by one of ordinary skill level in the art was not uncovered so as to result in the invention as recited in claims 1 and 12.

The prior art of record, specifically "Using the SNAP™ External Application Software Component," by Template Software, Inc. in view of "Getting Started with SNAP™," by Template Software, Inc. and further in view of United States Patent 6,748,455 B1 to Hinson et al. does not expressly teach or render obvious the invention as recited

in independent claim 8. As to claim 8, the prior art of record does not teach or render obvious the limitations as recited in claim 8, receive an event subscription directed to a subscribing component when the subscribing component has not been instantiated, the event subscription specifying subscriptions to one or more events generated by sub-components embedded by the subscribing component; cache events generated by the sub-components that are specified by the event subscription while the subscribing component has not been instantiated; forward any cached events to an instance of the subscribing component after the subscribing component is instantiated; receive one or more context mappings for a component, the context mappings being specified by a component embedder to exchange context data with the component, the context data comprising interface data and configuration data; if the component has not been instantiated, cache the specified context mappings; create the specified context mappings for the component after the component has been instantiated, when taken in the context of the claims as a whole.

Moreover, evidence for modifying the prior art teachings by one of ordinary skill level in the art was not uncovered so as to result in the invention as recited in claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
